Williston - Mercy Medical Center	701.774.7433	Yes	Yes	Yes

* The above facilities are known to stock rabies and/or rattlesnake biologicals. Other facilities not included may also stock these biologicals.

Prior to administration of rabies prophylaxis, suspect exposures should be individually evaluated to determine exact recommendations. If treatment for rabies is indicated, the treatment should include both rabies vaccine and rabies immune globulin (RIG) if the patient has not previously received pre or post-exposure prophylaxis.

Rabies Vaccine, RIG and antivenin ordering Information

Human diploid Imovax®, sanofi Pasteur, Phone: 800-822-2463 Website: <http://www.vaccineshoppe.com>
